

2004 Member Preferred Drug List

The following is a list of prescription drugs that are on the US Family Health Plan's Preferred Drug List. Medications listed on this sheet are available to you as part of your prescription drug benefit. Most injectables are covered even if not on this list. Certain restrictions, quantity limits, and/or prior authorization requirements may apply. Refer to your pharmacy benefit description.

Brand name medications are capitalized and generic medications are in lower case. Only the brand name drugs listed are considered preferred. As brand name medications become available generically, only the generic will be considered preferred.

We encourage you to show this brochure to your doctor each time a prescription is written. This will help avoid delays or inconvenience when you take your prescription to your pharmacy. If you have any questions please contact a MaxorPlus Customer Service Representative at 800-687-0707. (updated September 2004)
