Here are some helpful guidelines to help you keep a careful eye on your home and maintain safe habits. The safe way is always the best way to do things. Shortcuts may hurt. Correct unsafe conditions before they cause an accident. Take responsibility. Keep your home safe. Keep emergency phone numbers handy.

Cleaning your hands

The most important step to prevent the spread of germs and infections is hand washing. Wash your hands often. Be sure to wash your hands each time you:

- Touch any blood or body fluids
- Touch bedpans, dressings, or other soiled items
- Use the bathroom or bedpan

If you are coughing, sneezing, or blowing your nose, clean your hands often. Before you eat, always clean your hands.

➤ How you should clean your hands with soap and water

- Wet your hands and wrists with warm water
- Using soap, work up a good lather, and rub hard for 20 seconds or longer
- Rinse your hands well
- Dry your hands well
- Use a clean paper towel to turn off the water and throw the paper towel away

➤ How you should clean your hands with Alcohol-Based hand sanitizers (waterless hand cleaners)

- For gel product use one application
- For foam product use a golf-ball size amount
- Apply product to the palm of your hand
- Rub your hands together and cover all surfaces of your hands and fingers until they are dry. This should take around 20 seconds.

Medication

- If children are in the home, store medications and poisons in childproof containers and out of reach
- All medication should be labeled clearly and left in original containers
- Do not give or take medication that were prescribed for other people
- When taking or giving medication, read the label and measure doses carefully and know the side effects of the medication you are taking
- Review and understand storage requirements for your medication

Mobility Items

When using mobility items to get around, such as; canes, walkers, wheelchairs or crutches, you should use extra care to prevent slips and falls.

- Use extreme care to avoid using walkers, canes or crutches on slippery or wet surfaces
- Always put the wheelchairs or seated walkers in the lock position when standing up or before sitting down
- Wear shoes when using these items and try to avoid obstacles in your path as well as soft and uneven surfaces

Slips and Falls

Slips and falls are the most common and often the most serious accidents in the home. Here are some things you can do to prevent them in your home.

- Arrange furniture to avoid an obstacle course
- Secure throw rugs or remove them all together
- Install handrails on all stairs, showers, bathtubs and toilets
- Keep stairs clear and well lit
- Place rubber mats or grids in showers and bath tubs
- Use bath benches or shower chairs if you have muscle weakness, shortness of breath or dizziness
- Wipe up all spilled water, oil or grease immediately
- Pick up and keep surprises out from under foot including electrical cords
- Keep drawers and cabinets closed
- Install good lighting to avoid searching in the dark

Lifting

If it is too big, too heavy or too awkward to move alone - **GET HELP**. Here are some things you can do to prevent low back pain or injury.

- Stand close to the load with your feet apart for good balance
- Bend your knees and straddle the load
- Keep your back as straight as possible while you lift and carry the load
- Avoid twisting your body when carrying a load
- Plan ahead - clear your way

Electrical Accidents

Watch for early warning signs; overheating, a burning smell, sparks. Unplug the appliance and get it checked right away. Here are some things you can do to prevent electrical accidents.

- Keep cords and electrical appliances away from water
- Do not plug cords under rugs, through doorways or near heaters. Check cords for damage before use
- Extension cords must have a big enough wire for larger appliances
- If you have a broken plug outlet or wire, get it fixed right away
- Use a ground on 3-wire plugs to prevent shock in case of electrical fault
- Do not overload outlets with too many plugs
- Use three-prong adapters when necessary

Smell Gas?

- Open windows and doors
- Shut off appliance involved (*You may be able to refer to the front of your telephone book for instructions regarding turning off the gas to your home*)
- Don't use matches or turn on electrical switches
- Don't use telephone - dialing may create electrical sparks
- Don't light candles
- Call gas company from a neighbor's home
- If your gas company offers free annual inspections, take advantage of them

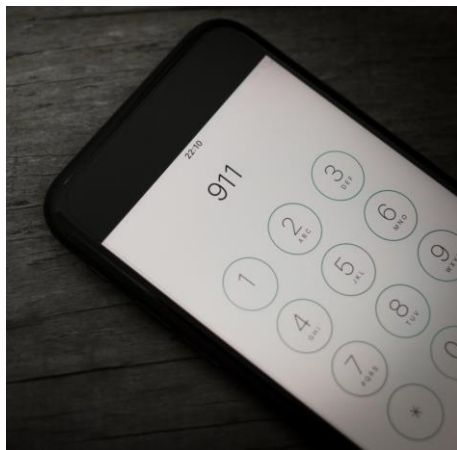

Fire

Pre-plan and practice your fire escape. Plan for at least two ways out of your home. If your fire exit is through a window, make sure it opens easily. If you are in an apartment, know where the exit stairs are located.

Do not use the elevator in a fire emergency. You may notify the fire department ahead of time if you have a disability or special needs. Here are some steps to prevent fires:

- Install smoke detectors as they are your best early warning, test frequently and change the battery every year
- If there is oxygen in use, place a "No Smoking" sign in plain view of all persons entering the home
- Throw away old newspapers, magazines and boxes
- Empty wastebaskets and trashcans regularly
- Do not allow ashtrays or toss matches into wastebaskets unless you know they are out and have been wetted down first or dump into toilet.
- Have your chimney and fireplace checked frequently
 - Look for and repair cracks and loose mortar
 - Keep paper, wood and rugs away from area where sparks could hit them
- Be careful when using space heaters.
- Follow instructions when using heating pad to avoid serious burns.
- Check your furnace and pipes regularly
 - If nearby walls or ceilings feel hot, add insulation
- Keep a fire extinguisher in your home and know how to use it

If you have a fire or suspect fire

1. Take immediate action per plan - Escape is your top priority
2. Get help on the way - with no delay - **CALL 9-1-1**
3. If your fire escape is cut off, close the door and seal the cracks to hold back smoke and signal help from the window

MEDICARE PRESCRIPTION DRUG COVERAGE AND YOUR RIGHTS

Your Medicare rights

You **have the right to request a coverage determination** from your Medicare drug plan if you disagree with information provided by the pharmacy. You also **have the right to request a special type of coverage determination called an "exception"** if you believe:

You **also have the right to ask** your Medicare drug plan **for an exception** if:

- you need a drug that is not on your drug plan's list of covered drugs. The list of covered drugs is called a "formulary;"
- a coverage rule (such as prior authorization or a quantity limit) should not apply to you for medical reasons; or
- you need to take a non-preferred drug and you want the plan to cover the drug at a preferred drug price.

What you need to do

You or your prescriber can contact your Medicare drug plan to ask for a coverage determination by calling the plan's toll-free phone number on the back of your plan membership card, or by going to your plan's website. You or your prescriber can request an expedited (24 hour) decision if your health could be seriously harmed by waiting up to 72 hours for a decision. Be ready to tell your Medicare drug plan:

1. The name of the prescription drug that was not filled. Include the dose and strength, if known.
2. The name of the pharmacy that attempted to fill your prescription.
3. The date you attempted to fill your prescription.
4. If you ask for an exception, your prescriber will need to provide your drug plan with a statement explaining why you need the off-formulary or non-preferred drug or why a coverage rule should not apply to you.

Your Medicare drug plan will provide you with a written decision. If coverage is not approved, the plan's notice will explain why coverage was denied and how to request an appeal if you disagree with the plan's decision.

Refer to your plan materials or call 1-800-Medicare for more information.
